## Specifications

The PROTRAN PR3110 pressure transmitter is designed to meet the requirements of the majority of applications where accurate low pressure measurement is required. Robustly constructed from stainless steel this range of pressure transmitters incorporates the latest silicon strain gauge technology together with a custom IC amplifier offering excellent stability and accuracy over a long service life. Pressure ranges are available from 0- 100 mbar to 0- 900 mbar, along with barometric options.

ATEX and IECEx approval and protection by intrinsic safety is optional and intended for installation and operation in zone 0, gas group IIC, temperature class T4 and zone 20 dust and M1 mining. DNV rules for classification of ships, high speed & light craft and DNV offshore standards.

### Typical applications include:

Low pressure fluid and gas applications
